

RFID Temperature Logger Solutions For Cold Chain Management

(Industries such as Logistics/ Healthcare/ Food)

Active NFC Tag: TT Sensor Plus 2

Features

Embedded (NFC) and temperature sensor microchip

: Registers the date, time (in UTC) and temperatures at programmable intervals. Up to 100,000 temperature events.

Internal Battery

: lasting up to three years.

The readers

: can be a PC USB NFC Reader and an NFC-enabled smartphone.

Operating Temperature

: -30°C to 60°C

Passive UHF Tag: Temperature Sensor Dogbone®

Features

International Standard

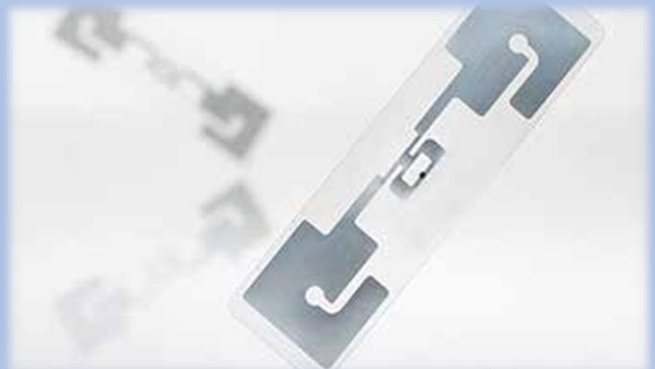

: ISO 18000-6C, EPC Class 1 Gen 2, EU Directive 2011/65/EU, 2015/863 Compliant

EPC and User Memory

: 128-bit and 128-bit

Operating Temperature

: -40 °C to 85 °C
