WISE-PaaS/SignageCMS

Interactive Content Creator for Signage Applications

WISE-PaaS/SignageCMS is a web-based content management system designed to deliver high-resolution multimedia in diverse formats to UShop$^+$ signage players. The system allows users to layout, schedule, and dispatch signage contents over the Internet to up to 500 remote display clients.

The software includes RESTful APIs that enable users to access and control applications from the server and to integrate various interactive devices, such as an RFID reader, beacon, or facial recognition system.
