B-SP2D

Label printing in the palm of your hand!

Interfaces

Based on its hugely successful predecessor the B-211, used in major portable applications the world over, the B-SP2D is completely compatible with B-211 software and supplies. It can communicate with pocket PCs or other mobile and static devices at an amazing six times faster than the B-211, either via its serial or infra-red interface.

Paper up to half a metre in length can be issued. Loading the labels and receipts is only a matter of 'drop and close'.

Speed

As with all TOSHIBA TEC products, speed is of key importance, and with a maximum print speed of over 3 inches a second and the latest high-speed 32-bit processor there's certainly no standing around!

Compact, light and hands-free

The B-SP2D can easily fit in the palm of your hand. Weighing in at only 380 grams including the battery, the B-SP2D leads the way in portability. It can be worn either vertically or horizontally using the adjustable belt clip.

Efficient battery use

The ultra-light lithium ion battery allows for around 600, 40 mm high labels to be printed before the battery status indicator reminds the user that charging is required. Battery power is also conserved with the new variable automatic power-off function.

Low cost of ownership

Equipped with a high quality 203 dpi thermal head that has an expected life, the new B-SP2D assures a lower overall cost of ownership. It has been designed for use in all types of environments, and its rugged rubber casing protects it from drop of up to one and a half metres. Backed up with TOSHIBA TEC's

unrivalled technical support and service, this printer is ideal for any business on the move.

Applications

The B-SP2D portable printer is the best solution whenever small and/or high quality labels are required in a mobile environment.

For example:

• Retail: shelf-edge labels, price and discount labels, receipts

- Warehousing, transport and logistics: shipping labels, inventory control labels, picking labels, tracking labels, routing labels
- Textile/clothing: swing tickets, sale price labels
- Ticketing: event entry tickets
- Route sales: invoicing and delivery notes
