FULL SECURITY & DATA MANAGEMENT OF YOUR PRIVATE EDI MESSAGE BOX

ONLINE MONITORING OF ALL TRAFFIC ACROSS DINET Asia

Notes: 1 kchar is equal to 1,000 characters of data being transmitted/received. In EDI Messaging terms this is equivalent to a lot of data. For example, Purchase Orders formatted as EDI Messages normally average around 1 to 1.5 kchars. An Acknowledgement message averages less than 0.5 kchars.

For those companies exclusively using DINET Asia as their own EDI Messaging VAN (Value Added Network) a detailed usage report is available and will be sent by E-Mail attachment that can be printed.

A change of rate band can only be effected at the end of the month after a request is received

These charges are current as at 01 February 2004 and apply in all countries in Asia and must be paid net of all bank charges and/or local taxes if applicable.
