

SysScan was awarded Hospital Authority's contract for "Supply of Wristband Printer, Patient Wristband and Related Accessories."

BACKGROUND

The Hospital Authority is a statutory body established on 1 December 1990 under the Hospital Authority Ordinance to manage all public hospitals in Hong Kong. It currently manages a Head Office, 41 public hospitals / institutions, 47 specialist outpatient clinics and 74 general outpatient clinics. The Authority mainly responsible for delivering a comprehensive range of secondary and tertiary specialist care and medical rehabilitation through its network of health care facilities.

OBJECTIVE To provide an accurate identification of patients by a secure, long-lasting patient wristband that won't fall off, fade, or smudge, even after lengthy admission or repeated washings and treatments.

SCOPE An estimated of 200 units of specialized wristband printers, TOSHIBA BSA4TM & INTERMEC PC4, will be installed in all public hospitals to facilitate the printing of barcode wristband for accurate identification of patients.

SysScan manufacture all the adult & infant wristbands. Bar code is printed on the direct thermal layer of wristband. Each wristband is comfort, streamline & durable. It is high resistance to blood, IPA, soap water, detergent, alcohol and common chemicals found in hospitals.

SysScan also manufactured the color button. There are many choices of color. Each button provide a non-transferable Security Closure to the wristband.
